LIGHTS SCREENS

# Our Services ?

## ● AV Consultancy

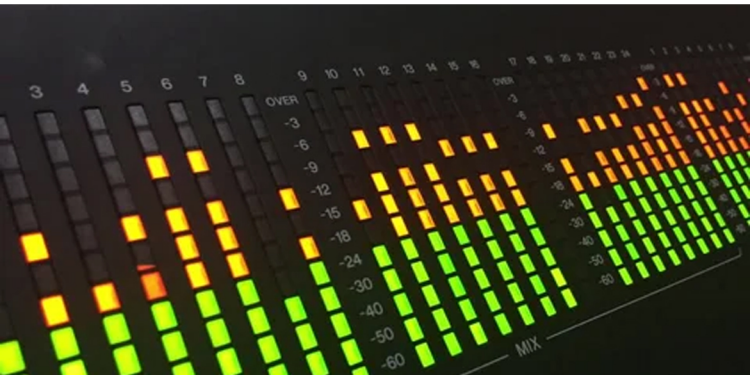

AV consultancy, or audio-visual consultancy, refers to the process of providing expert advice and guidance on the design, implementation, and maintenance of audio-visual systems. This includes services such as assessing client needs, selecting appropriate equipment and technologies, designing systems and integration plans, and providing ongoing support and maintenance.

## ● Audio Equipment Maintenance & Repair

Audio equipment maintenance and repair involves the process of inspecting, cleaning, testing, and repairing audio equipment to ensure it is functioning properly. This can include a wide range of equipment such as amplifiers, speakers, mixers, microphones, and other audio devices used in various settings such as recording studios, live events, or even personal use.

## ● Custom Built Stage Props

Custom stage props building is a specialized service that involves the design, fabrication, and installation of custom props for live performances, events, or film and television productions.

## Our --- Mission

Our mission is to transform the way people experience audio and visual technology. We are passionate about creating immersive and innovative solutions that enrich people's lives and enable them to connect with each other in more meaningful ways.

The first MP3 player was introduced in 1998 by a company called SaeHan Information Systems - it was called the "MPMan."

The first Blu-ray disc was introduced in 2006 - it had a storage capacity of 25 GB and was designed to hold high-definition video.

The first smartphone with a built-in projector was introduced by Samsung in 2010 - it was called the "Galaxy Beam."

The first 4K television (with a resolution of 3840 x 2160 pixels) was introduced in 2012.

The first virtual reality headset designed for consumers was introduced by Oculus VR in 2016 - it was called the "Oculus Rift."
